Appendix E

Details of Noise and Vibration Assessment Methodologies

E1 Noise and Vibration

E1.1 Introduction

This *Appendix* provides details of the methodologies and assumptions made in various parts of the noise assessment. This detail has been removed from the main text in order to avoid burdening the general reader with detailed methodology, but nonetheless it contains important information on the way in which the results and conclusions of the noise studies have been reached.

In addition, this *Appendix* contains certain input data and assumptions that were current at the time of writing. A glossary of acoustic terms is provided in *Section E1.4*.
